
Individual paired outbreaks at a 10% budget cap
karate / static (n=900)
dolphins / static (n=900)
football / static (n=900)
netscience / static (n=900)
karate / dynamic (n=900)
dolphins / dynamic (n=900)
football / dynamic (n=900)
netscience / dynamic (n=900)
Hybrid .5: infected nodes
CIB: infected nodes
AR: infected nodes
MIG: infected nodes
Outbreak pairs (log count)
Below diagonal = treatment better; above = control better. Bubbles show exact infection counts; size/color indicate overlapping pairs. All activities/betas; one budget avoids four repeats.
